

Procedures for Application and Turn on of Electricity Supply

Scope

- Introduction
- Submission of Consultation Form
- Submission of Application of Electricity Supply for:
 - Direct Connection Load up to 45 kVA
 - Direct Connection Load more than 45 kVA
 - Indirect Connection Load up to 45 kVA
 - Indirect Connection Load more than 45 kVA
 - New EHT & HT consumers who wish to be contestable at time of turn-on
- Common response for incomplete submission of applications

Scope (Con't)

- Different Inspections Performed
 - Inspection for small electrical installation
 - Inspection for large domestic electrical installation
 - Sample Unit Inspection in Private Residential Development
 - Inspection and Pre-turn on of HDB Residential Units
 - Inspection of Bulk Replacement of Meter Boards
- An Overview on Contestability
- Acknowledgement of Electrical Installation License Form during account opening

lotrocuction dineers

Introduction

SP Services

SP PowerAssets

SP PowerGrid

Market Support Services Licensee

- Receives requests for electricity service connection, offers terms and conditions of service connection.
- Arranges for service connection energisation/turn-on
- Collects transmission charges, security deposits and charges other services.
- Bills customers for consumption.

Transmission Licensee

Owner of the transmission and distribution network

Managing Agent for and on behalf of SPPA

 Develops, operates and maintains the transmission and distribution facilities.

Submission Of Consultation Form

Customers may seek consultation on technical requirements at initial planning stage. The consultation form will be submitted directly to SPEG

For Submission, the following information is required

Site and location plans	Gross floor	Type of premises	Type of business activity	Supply requirement	Expected energization date
-------------------------	-------------	------------------	---------------------------	--------------------	----------------------------

Application For Different Connection Schemes

SPgroup

Types Of Connection Schemes

Supply Direct From Grid

Direct Connection

- Up to 45kVa
- More than 45kVa

Supply Through

Connection

- Up to 45kVa
- More than 45kVa

Application For Direct Supply Up To 45kVa

LEW submits online application form on behalf of consumer to Electrical Installation Section (Supply Application) with relevant attachments

Electrical Installation
Section (Supply
Application) liaise with
SPPG and sends
quotation to consume
and LEW within 10
business days

Consumer pays and LEW fulfills intake conditions

LEW applies to Electrical Installation Section (Supply Application) to request for meter fixing, testing and turn on

Customer opens utility account with Sporoup and pays security deposit

SPPG commence work and informs customer and LEW upon completion

Submit online form CS5 and attach the following documents to SPS Electrical Installation Section (Supply Application) for meter fixing, testing and turn on

COC

Letter of Consent

CS/12 (If applicable)

Application For Direct Supply > 45kVa

LEW submits online application form on behalf of consumer to Electrical Installation Section (Supply Application) with relevant attachments

Electrical Installation
Section (Supply
Application) liaise with
SPPG and sends quotation
to consumer and LEW
within 10 business days

Consumer pays and LEW fulfills intake conditions

•

LEW applies to SPS
Electrical Installation
Section for meter fixing and
turn on

Customer opens utility account with SPgroup and pays security deposit before application for LEI with EMA

SPPG commence work and informs customer and LEW upon completion

Submit online form (\$1 and attach the fellowing documents to SPS Electrical Installation Section for meter fixing, testing and turn on

COC

Letter of Consent

El License

IRAS Certificate of numbering (if applicable)

Application for Direct Supply > 45kVa

Turnaround time for SPgroup to inform applicant and LEW on approval for

Connection up to 22KV

10 business days

Connection for 66KV

60 business days

Connection for 230KV

100 business days

For Service with substation

• LEW shall submit the Substation and metering plans to SPPG for clearance

For Service with substation

• There will be an agreement which needs to be signed by the consumer together with the quotation payment before SPPG starts work

For contestable LT and all HT Connections

The requirements for AMI meters apply

Application for Indirect Supply up to 45kVa

Customer opens
utility account
and pays
Security Deposit
to SPgroup

Installation Section (Supply Application) with relevant documents for meter fixing, testing and turn on

Submit online form \$55 and attach the following documents to SPSL for meter fixing, testing and turn on

Form CS/3

COC

Note: 1st time inspection is FOC and Form CS/3 or Form CS/3H is not required for HDB residential premises

Application for Indirect Supply > 45kVa

Customer opens utility account and pays Security Deposit to SPgroup

LEW applies to EMA for El License

LEW stall submit relevant forms to Electrical Installation Section (Supply Application for meter fixing and oeclare account activation date

LEW liaise with Electrical Meters Section to install meters

Submit online form CS7 and attach the following documents to SPSL

Form CS/3 or CS/3H

El License

COC

For HT Indirect Connection

The consumer is required to sign an agreement with SP Power Assets before SP Services can process the application for installation of meter.

The LEW shall be responsible for arranging the energization of the service connection with landlords such as HDB, ATC or private multi-tenanted buildings.

Landlord's LEW shall issue the Statement of Turn On of Electricity (SOTO) upon successful turn-on.

For New EHT and HT Consumers To Be Contestable At Time Of Turn On

LEW submits online Form CS6 to Electrical Installation Section (Supply Application)

Meters Section for meter fixing

Forsumer submit application for Contestability status and MSS account to Spgroup's (Customer Applications Section)

Points to note

AMI meters requirement applies

Application for Contestability Status
and Application to open a MSS
Account to Oustomer Applications
Section of SPgroup at 2 Kallang
Sector S(349277) or via fax: 63048633 at least 12 business days prior to
the arrangement for the turn-on
appointment.

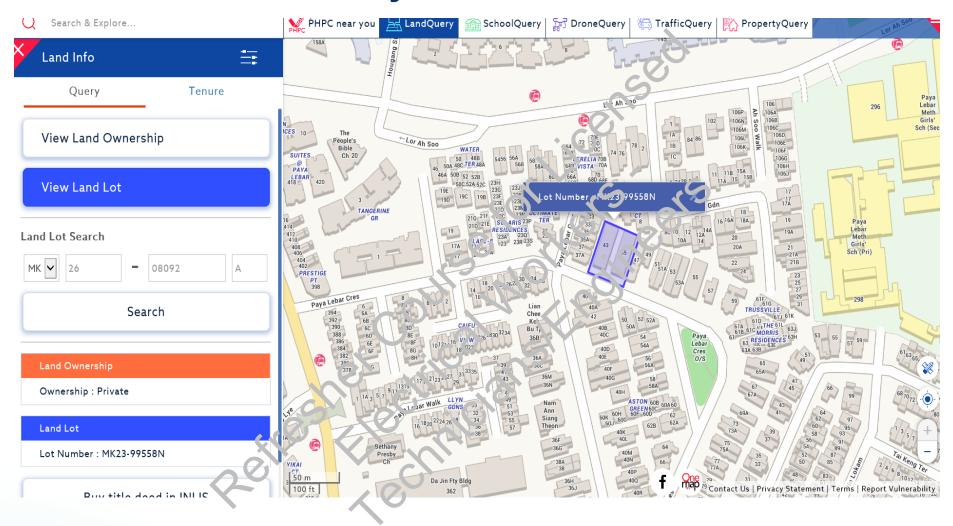

To purchase electricity from Retailer from turn-on date, Retailer must submit a transfer request to SP services at least 1 business day before turn-on date. Otherwise, SPgroup shall purchase electricity for the customer from the wholesale electricity market

Common response for incomplete submission of applications

SPgroup

Different Inspections Performed

Types Of Inspection Carried Out By Electrical Installation Section

Small Electrical Installation

Large Domestic Electrical Installation

Pre-turn-on of HDB Residential Units

Bulk Replacement of Meter Boards

Private Residential Development

Small Electrical Installation

Electrical
Installation Section
arranges and
issues inspection
appointment letter
to the LEW

Electrical Meters
Section will instal
meter one day
before the
inspection date

Installation Section attends to the inspection appointments and turns on the installation if the inspection is passed

Points to note

If the inspection result is 'Failed', LEW must rectify the noncompliances, pay a re-inspection fee and re-submit COC to apply for re-inspection appointment A copy of the SP Services inspection report will be given to the LEW and applicant or his representative on site.

Violation clauses on the electrical installation will be sent to EMA

Points to note

Inspection of
electrical
installation is
carried out in
accordance with
SS638 (Code of
Practice For
Electrical
Installations) and
the relevant
regulations

For direct grid connection, LEW submits Certificate of Readiness (COR) to SP Services on site. This document is not necessary for indirect connection

For direct grid connection, Sparoup issues "Statement of Turn On of Electricity" and acknowledged by the LEW and applicant or his representative

For indirect connection, the landlord LEW issues "Statement of Turn On of Electricity" and acknowledged by the LEW and applicant or his representative

Large Domestic Electrical Installation

LEW submits application to Electrical Installation Section to request for inspection appointment

Electrical Installation Section checks the submitted documents and issues appointment letter

Electrical
Meters
Section
installs
meter 1 day
before the
testing
appointment

the service connection (for carrect grid connection) and LEW will turn-on the electricity supply to the electrical installation if the inspection result is "Passed"

Spgroup will
issue a
"Statement of
Turn On of
Electricity" to
the LEW and
Applicant or
his
representative

Documents required to be submitted for meter fixing and turn on

Form E

SLD

COC

IRAS Cert of numbering

Account opening letter

Note: For all installations > 45kVa, only domestic installations needs to be tested by SPSL

Points to note

SPgroup carries out inspection on the electrical installation in accordance with SS638 (Code of Practice For Electrical Installations) and other relevant regulations

On the appointment day.

LEW submits COR to SPgroup's Project Officer on site (for sirect Crid connection)

If the inspection result is failed,
LEW must rectify the defects, pay a re-inspection fee and re-submit the COC & Form E to request for a reinspection appointment

A copy of the inspection report will be given to the LEW and applicant or his representative on site. Violation clauses on the electrical installation will be sent to EMA

Indirect Supply Up To 45kVa

SA Section arranges and issues inspection appointment letter to the Jerres SANIE acorder to the Jerres SANIE acord

There is **NO NEED** to submit **COR** to SPSL on-site

Modification Of Electrical Installation

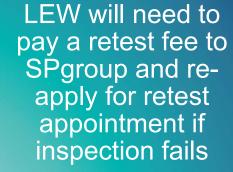

Only Those Exempted from Licensing

LEW submits request to Electrical Installation Section

Electrical
Installation Section
conducts spot
checks for system
selected
applications

Documents required to be submitted to SPSL

Online Form CS5

Form CS/3 or CS/3H

Completion Cert for Modification of Electrical Installation

Note: First-time inspection is free-of-charge | Form CS/3 or Form CS/3H not required for HDB residential premises | Once the inspection pass, acknowledgement letter will be sent to consumer and the LEW

Sample Unit Inspection in Private Residential Development

LEW performs own testing and certifies Form E for all residential units in the building

LEW submits Form E.C. SLD and IRAS Letter (stating the list of official addresses of the residential units) to Electrical Installation Section to request for an appointment for sample unit inspection

Electrical Installation
Section will notify
Electrical Meters
Section to conduct a
separate inspection on
the meterboards set-up

After all meters have been installed to the residential units, LEW submits COC to Electrical Installation Section to request for pre-turn-on inspection appointment

If inspection of all selected units is elected units is essed and meterboard setup is cleared by Electrical Meters Section, LEW to liaise with Electrical Meters Section for bulk meter fixing

Sample Unit Inspection in Private Residential Development

Electrical Installation
Section conducts
pre-turn-on
inspection to all
individual units.

Upon successful inspection of each residential unit of the block, LEW turns-on the electricity supply up to meter board and issues "Statement of Turn On of Electricity".

Section sends a letter of completion to the LEW and developer to inform of the completion of the unit inspection

Points to note

If there are noncompliances found in the
electrical installations
which cannot be rectified
during the inspection, a
failure letter will be issued
to the LEW and copy to the
developer as well as Energy
Market Authority.

LEW must rectify the noncompliances, pay a reinspection fee and request for an appointment for reinspection. Electricity supply to the residential unit will only be turn-on after the owner of the individual unit opens an account with SP Services.

Inspection And Pre Turn On Of HDB Residential Units

LEW carries out his own testing of the electrical installations and certifies Form E for all the residential units of the block

HDB conducts own testing and submits certification letter to Electrical Installation Section together with the LEW endorsed COC, Form E and SLD to request for appointment to inspect & preturn-on the residential units

HDB arrange with Electrical Meters Section to bulk fix meters to all residential units in the block

Inspection And Pre Turn On Of HDB Residential Units

On the appointment day, Electrical Installation Section conducts a sample unit inspection for each of the unit types in the blocks.

If sample unit inspection passed, Electrical Installation Section will proceed with the pre-turn-on inspection to all the units in the block. Upon successful inspection of each unit, electricity supply is turn-on to the unit DB

Points to note

LEW issues

"Statement of Turn On of Electricity" for the block with acknowledgment by HDB

SPgroup displays a "Cartion" sticker and a guidance booklet at the unit DB informing the owner to check the electrical installation before use, as well as to open an account with SP Services

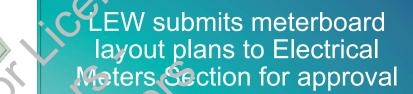

found in the electrical installations which cannot be rectified during inspection, a failure letter will be issued to the LEW, HDB and the Energy Market Authority

LEW must rectify the non-compliances, pay a re-inspection fee and request for an appointment for re-inspection

Bulk Replacement Of Meter Boards

LEW submits online form CS/5 to Electrical Installation Section for bulk replacement of meterboards in multi-tenanted building

LEW inspect & test the meterboards and Subman cables replaced and cartifies Form F – Cat Cation of But Shifting/Replacement of Meterboards in Tenanted Buildings

LEW submits Form P together with shut-down notice issued by Town Council/Managing Agent, to obtain permission from SPgroup to break meter terminal seal for the replacement of meterboards

Bulk Replacement Of Meter Boards

LEW submits certified Form F, acknowledged Form P, SPPG's approval letter and SLD to Electrical Installation Section to request appointment for inspection of bulk replacement of meterboard

On the appointment day, SPgroup carries out the following inspection in the presence of the LEW

SPgroup carries out the following inspection in the presence of the LEW

Visual inspection of meterboard set-up

Meter number and unit address to tally with meter listing in SPSL's records

Meters are not transposed with the neighboring units

Meter rotation and polarity check of one SSO inside the unit

Note: SPgroup re-seals all meter terminals after inspection and a completion inspection letter will be issued to the LEW and Landlord/MCST

Contestability In The Electricity Market

SPgroup

Started in July 2001

Launched in Stages

Encourage competition and provide more choices

Purchase electricity from licensed electricity retailers (Retailer Consumer)

Purchase electricity
directly from the spot
market as a direct
market participant
(Direct Market
Consumer)

Purchase electricity indirectly from the spot market through SP Services Ltd (MSSL Consumer)

SP Services Ltd, as the MSSL,

Provides
regulated
Market
Support
Services
such as retail
settlement,
meter reading
and meter
data
management

Facilitates
consumer
registration
and transfer
processing
for
contestable
consumers to
switch
retailers

Provides
billing and
payment
collection of
transmission
service
charges on
behalf of SP
PowerAssets
Ltd.

Facilitates indirect access for contestable consumers to spot market Supplies
electricity to
noncontestable
consumers at
regulated
tariff.

Contestability is open to Domestic and Non Domestic Consumers fulfilling any of these criteria

Low tension

High tension supply

Extra high tension supply

Ultra high tension supply

Example of the retailers are:

Keppel Electric Pte Ltd SembCorp Power Pte Ltd Senoko Energy Supply Pte Ltd

Seraya Energy Pte Ltd Tuas Power Supply Pte Ltd Acknowledgement of Electrical Installation License Form
